CONTENTS OF VOLUME 55

Number 1, September 1973

Su C. Kuo and Ezzat S. Younathan. A Specific Micromethod for Determination of Acetyl Residues in Proteins 1

Michael A. Schlossberg and Vincent P. Hollander. A Rapid Radiochemical Assay for Hypoxanthine-Guanine Phosphoribosyltransferase 9

Peter S. Chan, Charles T. Black, and Betty J. Williams. Separation of Cyclic 3′,5′-AMP from ATP, ADP, and 5′-AMP by Precipitation with Inorganic Compounds 16

J. Kalmakoff and C. C. Payne. A Simple Method for the Separation of Single-Stranded and Double-Stranded RNA on Hydroxyapatite 26

Werner Hönig, Rudolf K. Zahn, and Walter Heitz. A Method for Characterization and Fractionation of Deoxyribonucleic Acid by Continuous Turbidimetry of Cetyltrimethylammonium-DNA Precipitates 34

Marjorie F. Lou. A Split Stream Ion Exchange Chromatographic Method for Isolating Amino Acids and Peptides 51

A. Fritsch. Properties of Various Rotors Used for Zone Centrifugation 57

C. McLean, D. A. Werner, and David Aminoff. Quantitative Determination of Reducing Sugars, Oligosaccharides, and Glycoproteins with [^{3}H] Borohydride 72

Arthur L. Rosenthal and Abraham Saifer. Continuous UV Monitoring of Fluorogenic Substrates. I. Kinetic Analysis of *N*-acetyl-β-D-hexosaminidases 85

Günther Wiedner, Bernd Simon, and Lothar Thomas. Carbonic Anhydrase: A New Method of Detection on Polyacrylamide Gels using Conductivity Measurements 93

P. A. Liberti. On Simplified Least Squares Slope and Intercept Computations with Application on Sedimentation Coefficients 98

Li-Li S. Y. Chia, Kurt Randerath, and Erika Randerath. Base Analysis of Ribopolynucleotides by Tritium Incorporation Following Analytical Polyacrylamide Gel Electrophoresis . 102

Thomas G. Pretlow II, and Edwin E. Williams. Separation of Hepatocytes from Suspensions of Mouse Liver Cells Using Programmed Gradient Sedimentation in Gradients of Ficoll in Tissue Culture Medium 114

Derek Horton, Joseph D. Wander, and Rodger L. Foltz. Chem-

ical-Ionization Mass Spectrometry of Carbohydrates: Behavior of the Antibiotic Celesticetin Under Various Conditions of Ionization 123

Jon C. Nixon, Kenneth S. McCarty, Jr., and Kenneth S. McCarty, Sr. The Use of a Reorienting Density-Gradient Rotor with Continuous Sample Flow for the Isolation of Calf Thymus Nuclei 132

R. Davies and Frances J. Wayman. Estimation of Glucose and Invertase Activity in Presence of Thiols 143

R. B. Jones, A. J. Staton, and L. A. Kiesow. Isolation of Rat Liver Plasma Membranes by Zonal Centrifugation: Increased Yield with Ca^{2+} 154

M. J. Kessler and J. M. Clark, Jr. Synthesis of Isotopically Labeled Δ^2-Isopentenylpyrophosphate 160

Donald M. Kirschenbaum. Molar absorptivity and $A^{1\%}_{1cm}$ Values for Proteins at Selected Wavelengths of the Ultraviolet and Visible Regions. VIII 166

Martti Parvinen, Erkki Soini, and Pentti Tuohimaa. An Automatic Gas Counter for Quantitative Micro-Determinations of Tritium in Biological Material 193

Abraham Mates. A Sensitive Method for Determination of Lipase Activity from Cellulose Acetate Strips 201

John R. Shainoff and William E. Braun. Purification of Anti-Fibrinogen Antibodies 206

Dennis Bray and Susan M. Brownlee. Peptide Mapping of Proteins from Acrylamide Gels 213

F. B. St. C. Palmer and D. W. Russell. Extraction of 2,4,6-Trinitrophenyl Derivatives of Amino Acids and Peptides from Aqueous Acid. A Simple Method for Determining Aminotripeptidase Activity 222

W. E. Pereira, Y. Hoyano, W. E. Reynolds, R. E. Summons, and A. M. Duffield. The Simultaneous Quantitation of Ten Amino Acids in Soil Extracts by Mass Fragmentography . . 236

Ruth E. Benesch, Reinhold Benesch, and Suzanna Yung. Equations for the Spectrophotometric Analysis of Hemoglobin Mixtures 245

Tomokazu Suzuki, Ruth E. Benesch, Suzanna Yung, and Reinhold Benesch. Preparative Isoelectric Focusing of CO Hemoglobins on Polyacrylamide Gels and Conversion to Their Oxy Forms 249

M. Cranmer and A. Peoples. Determination of Trace Quantities of Anticholinesterase Pesticides 255

James M. Phang, Sylvia J. Downing, and David Valle. A Radioisotopic Assay for Δ^1-Pyrroline-5-Carboxylate Reductase . . 266

James M. Phang, Sylvia J. Downing, and David Valle. A Radioisotopic Assay for Ornithine-δ-Transaminase 272
Alan D. B. Malcolm. The Temperature Dependence of the Spectroscopic Properties of Reduced Nicotinamide Adenine Dinucleotide 278
François Widmer, Jack E. Dixon, and Nathan O. Kaplan. An Apparatus for the Determination of Kinetic Parameters Associated with Immobilized Enzymes 282
Nelly Blumenkrantz and Gustav Asboe-Hansen. A Quick and Specific Assay for Hydroxyproline 288
Thomas B. Friedman and Carl R. Merril. A Microradiochemical Assay for Urate Oxidase 292
M. F. Guérin and D. H. Hayes. A Multiple Adapter for the SW 25 Rotor 297
Julian N. Kanfer, George Petrovich, and Richard A. Mumford. Purification of α- and β-Galactosidases by Affinity Chromatography 301

Short Communications

Dean R. Haubrich and Joan S. Denzer. Simultaneous Extraction and Fluorometric Measurement of Brain Serotonin, Catecholamines, 5-Hydroxyindoleacetic Acid and Homovanillic Acid 306
Jean-Marie Matthieu and Richard Hudson Quarles. Quantitative Scanning of Glycoproteins on Polyacrylamide Gels Stained with Periodic Acid-Schiff Reagent (PAS) . . . 313
T. O. Diener. A Method for the Purification and Reconcentration of Nucleic Acid Eluted or Extracted from Polyacrylamide Gels 317
D. K. Kidby and D. J. Davidson. A Convenient Ferricyanide Estimation of Reducing Sugars in the Nanomole Range 321
William H. Lederer and Harry L. Gerstbrein. A Manifold for Concentrating to Dryness Multiple Organic Solvent Samples Simultaneously and Rapidly for Thin-Layer or Gas Chromatography 326
Michael W. Neal and James R. Florini. A Rapid Method for Desalting Small Volumes of Solution 328

Number 2, October 1973

Hubert E. May and Donald J. Reed. A Kinetic Assay of TPNH-Dependent Microsomal Lipid Peroxidation by Changes in Difference Spectra 331

Eric F. Eikenberry. Generation of Density Gradients. Approximations to Equivolumetric Gradients for Zonal Rotors . . 338
Toshiko Nakao, Makoto Nakao, and Fumiko Nagai. Microdetermination of Protein Not Affected by the Presence of Various Buffers, Sucrose, ATP, and Eluates from Polysaccharide Derivatives 358
Mats Hamberg. Quantitative Studies on Prostaglandin Synthesis in Man. II. Determination of the Major Urinary Metabolite of Prostaglandins $F_{1\alpha}$ and $F_{2\alpha}$ 368
Woo Ik Hwang and Sungman Cha. A New Enzymatic Method for the Determination of Inorganic Phosphate and Its Application to the Nucleoside Diphosphatase Assay 379
Elsie Wainfan and Jennifer Chu. A Simple Specific Assay for Uracil tRNA Methylases of Enteric Bacteria: Use of Ribothymidine-Deficient tRNA 388
Bradley N. White and G. M. Tener. Small Analytical BD-Cellulose Columns for Rapid Chromatography of Aminoacyl tRNAs 394
E. P. Pittz and B. Bablouzian. Construction and Performance of the Brice Photoelectric Differential Refractometer . . . 399
James K. Coward and Felicia Ying-Hsiueh Wu. A Continuous Spectrophotometric Assay for Catechol-O-Methyltransferase 406
Phillip Pekala and Richard A. Hartline. Isolation of Radioactive D- and L-α-Aminoadipate of High Specific Activity by Selective Bacterial Metabolism 411
C. Braestrup. Identification of Free and Conjugated 3-Methoxy-4-hydroxyphenylglycol (MOPEG) in Rat Brain by Gas Chromatography and Mass Fragmentography 420
Eugene Howard. Isolation of Low Molecular Weight Nuclear RNA from Small Numbers of Nuclei with Cetyltrimethylammonium Bromide 432
Donald J. Jenden, Margareth Roch, and Ruth A. Booth. Simultaneous Measurement of Endogenous and Deuterium-Labeled Tracer Variants of Choline and Acetylcholine in Subpicomole Quantities by Gas Chromatography/Mass Spectrometry . . 438
Joseph G. Cory, Francis A. Russell, and Mary M. Mansell. A Convenient Assay for ADP Reductase Activity Using Dowex-1-Borate Columns 449
Herbert Tabor, Celia White Tabor, and Filadelfo Irreverre Quantitative Determination of Aliphatic Diamines and Polyamines by an Automated Liquid Chromatography Procedure 457
Walter L. Hughes, Mary Christine, and B. David Stollar. A Radioimmunoassay for Measurement of Serum Thymidine . 468
Arved Datyner and Elizabeth D. Finnimore. A Prestaining Method for the Quantitative Assay of Proteins on Polyacrylamide Gels 479

T. R. C. Boyde and M. A. Remtulla. Continuous Preparative Gel Electrophoresis 492
B. S. Middleditch and D. M. Desiderio. Mass Spectra of Prostaglandins. IV. Trimethylsilyl Derivatives of Prostaglandins of the F Series 509
I. McIlwaine, D. Rodeard, and A. Chrambach. Characterization by Polyacrylamide Gel Electrophoresis of Hemoglobins in Rabbit Embryo, Fetus, and Adult 521
R. Metlaš, S. Popić, and D. Kanazir. Preparation of Ribosomal Subunits from Rat Liver Postmitochondrial Supernatant . . 539
Archie L. Murdock and Harriet Kim. Determination of Microgram Quantities of Protein in 65–80% Salt Solutions . . . 544
Volker Herzog and Dariush Fahimi. A New Sensitive Colorimetric Assay for Peroxidase Using 3,3′-Diaminobenzidine as Hydrogen Donor 554
Jose Madrid Concon. Rapid and Simple Method for the Quantitative Extraction of Corn Endosperm Proteins 563
Ken Harewood and J. S. Wolff III. A Rapid Electrophoretic Procedure for the Detection of SDS-released Oncorna-Viral RNA using Polyacrylamide-Agarose Gels 573
Anders Grubb. Preparation of Electroendosmosis-Free Agarose Gel and Exemplification of Its Use in Crossed Immunoelectrophoresis 582
Anita A. Suran. A Simple Microradioisotopic Assay for 5′-Nucleotidase Activity. Application to Central Nervous Tissues 593
Richard M. Van Frank and Walter J. Kleinschmidt. Concentration and Purification of Two Small RNA Viruses: Mycophage PS-1 and Bacteriophage ϕ6 601
K. J. Ellis. Errors Inherent in the Use of Piston Activated Pipettes 609

Short Communications

T. Nagatsu, P. Thomas, R. Rush, and S. Udenfriend. A Radioassay for Dopamine-β-Hydroxylase Activity in Rat Serum 615
Helena Holmberg and Pirkko Huttunen. Electrophoretic Staining of Histones in Polyacrylamide Gels 620
John I. Peterson, Julian W. Holland, Jr., William R. Dehn, and H. Douglas Swank. Construction of a Partitioned Gel Slab Electrophoresis Cell of Fused Borosilicate Glass 623
George Bölcsföldi and Eva Eliasson. Automatic Collection of Samples from Suspension Cell Cultures for Investigations of Prolonged Metabolic Processes 626

L. V. Turner. An Easily Constructed Elution Chamber for Preparative Gel Electrophoresis 630
J. Littlechild. Nuclease Contaminant of a Batch of Lysozyme Used for Ribosome Extraction: Cleavage of *Escherichia coli* 23S rRNA into Two Specific Fragments . . 634
Norman S. Radin. Vial Rinser for Reuse of Scintillation Vials 637
E. M. Baker, D. C. Hammer, J. E. Kennedy, and B. M. Tolbert. Interference by Ascorbate-2-Sulfate in the Dinitrophenylhydrazine Assay of Ascorbic Acid 641
Jürgen Reiss. Semiquantitative Estimation of Aflatoxins on Thin-Layer Chromatograms with a Gray Scale . . . 643

Author Index 646

Subject Index for Volume 55 will appear in the December 1973 issue as part of a cumulative index for the year 1973.

We've made Cyclic AMP Assay so easy...

Just add water and stir.

Simplify your research procedure with our all-in-one Cyclic AMP Assay Kit; designed to accurately measure cyclic AMP levels in the range of 2-16.0 pmol per incubation tube. The kit provides everything for the construction of one standard curve (five levels of cyclic AMP in duplicate) and the assay of 65 unknowns in duplicate. The reagents are freeze-dried for your convenience and may be stored under normal refrigeration. To reconstitute the reagents, just add water and stir.

- Short counting time (1-4 minutes)
- Very low cross-reaction with cyclic GMP and ATP
- Excellent reproducibility
- A linear calibration curve — easier to construct and use.

With the new Cyclic AMP Assay Kit from Amersham/Searle, you build your curves the easy way. Contact our Technical Service Department for detailed information.

Our specific activity is service.

Second Edition

The Vitamins

Chemistry, Physiology, Pathology, Methods

Volume 5

Edited by W. H. Sebrell, Jr.

Institute of Nutrition Sciences
Columbia University
New York, New York

Robert S. Harris

William F. Lasby
Professor in the
Health Sciences
University of Minnesota
Minneapolis, Minnesota

REVIEWS OF THE FIRST EDITION

". . . a monumental undertaking, and will immediately take its place as a standard reference work and source book for everyone doing research on the biochemistry of vitamins . . . We owe a debt of gratitude to the editors and to the authors for their most successful endeavor."

—NATURE

"Anyone who expects to have a library well supplied with vitamin literature will find this volume a must."

—JOURNAL OF CHEMICAL EDUCATION

CONTENTS:

Riboflavin. Thiamine. Tocopherols. New and Unidentified Growth Factors.
Author Index—Subject Index.
